CENTRAL LIBRARY

METHOD OF COMPUTING PER DAY USAGE OF LIBRARY

For per day usage calculation, we were taking data on the basis of book transaction report from library software and footfall register. We were taking the user data for book transactions from library software and other services like photocopy, printout, browsing, newspaper reading etc. from footfall register.

Formula:

$$\frac{\text{Number of teachers and students using library per day}}{\text{Total number of teachers and students}} \times 100$$
